13.14. RANGE OF TROT FOR ENGLISH AND DRIVING HORSES. Range of motion varies for the different English and Driving classes. This section is intended to show the relationships between motions in these classes. This description is NOT intended to set a literal standard. Motion is just one part of a horse's performance, which includes many other components of evaluation. Motion involves proper balance between the front and the rear end. Significant rear-end engagement and impulsion are equally important parts of a horse's overall motion. Regardless of the height of the trot, a horse should show a rhythmic, cadenced gait with adequate suspension and freedom of movement, versus a tight, "trappy" movement. The following diagram shows the relative levels of motion for the various classes:
