Rule Change Intent

In an effort to align more closely with the edited GR838, the National Hunter Committee recommends updating the equine welfare rules in both the hunter and equitation chapters. These changes include a reference to GR838 for acts that are prohibited. To avoid repetitiveness between the discipline chapters and the GR, there are strikeouts of actions included in GR838. This updated unethical treatment of the horse also includes additional language on how many times a horse may be struck with a whip consecutively.

Council - Member Services

Draft 1: Recommends Disapproval 05/27/2025

Draft 1: The Council agrees with and supports the intent of this proposal but has concerns specifically around the proposed language in HU100.1.d regarding use of the whip. The Council has concerns with the use of the word “striking” and how it would be enforced since no definition of strike is provided. Additionally, the Council had concerns about applying a numerical limit to the number of times a whip can be used, rather than addressing the manner in which the whip is used. The Council prefers the wording in the USEF-proposed rule change to GR803 (Tracking #243-24) concerning whip use and would recommend approval of this proposal if a reference to GR803 were provided in HU100.1.d instead of the currently proposed language.

Draft 1: Recommends Disapproval 04/14/2025

Draft 1: The LOC agrees with the intent and majority of language within this rule change proposal. The Committee would recommend approval if some of the following considerations were addressed regarding 1.d. There was concern about applying a numerical number to the amount of times a horse could be "struck." There was a preference to providing a description of when using a crop is appropriate rather than the maximum number of times is was permitted as that may encourage negative behavior and increase pressure for a rider to implement harsh discipline. The usage of the term "consecutive" could be considered a gray area and therefore difficult for judges to interpret. In general, there was also concern of using the language "strike" due to its negative connotation and its affects it may have regarding social license to operate.
