Entry.

All Horses entered on the FEI Nominated Entry will be re-examined for soundness by the Team Veterinarian and/or a Team Evaluating Veterinarian, if requested by the Team Veterinarian prior to traveling to the Championship.

Exceptions may be granted for emergency situations. The Team Veterinarian must be apprised of any emergency within 24 hours of the treatment.

Failure to submit to such examination may result in the removal of the Athlete from the selection process upon the recommendation of the USEF-approved physician(s) and with the approval of the USEF Board of Directors or an Ad Hoc Selection Group approved by the Board of Directors. Following the examination, should the USEF-approved physician(s) find the Athlete to be unfit to compete, the Athlete may be removed from the selection process with the approval of the USEF Board of Directors or an Ad Hoc Selection Group approved by the Board of Directors.

DEFINITIONS:

BOLDNESS – Whether the Athlete/Horse combination moves forward with confidence, aggression, and vigor demonstrating a positive attitude. When presented with a question (any situation that the Athlete/Horse must answer to successfully negotiate the test, e.g., an obstacle, change of terrain, handling crowds, jumping into water, etc.), whether the Athlete/Horse combination answer the question with the same positive attitude.

COMPETITION RECORDS – Records of past competitions may be sourced from the USEF, USEA, FEI or other applicable governing bodies to review an Athlete/Horse combination's scores in the dressage, show jumping and cross-country phases.

EQUIRATINGS HIGH PERFORMANCE METRICS –

ELO Score

Eventing is a complex sport, and it can be difficult to rank horses in order of their overall *quality* and *consistency* using a single metric. The EquiRatings Elo does exactly this. It is a ranking algorithm that is affected *every time* a horse starts the cross-country phase of an event (withdrawals *prior* do not affect the metric). In terms of a single metric for predicting finishing position, this is the best in class. The Elo rewards horses that beat highly rated opponents, thus accounting for the quality of a competition.

EquiRatings Expected Values

To assess the expected performance of a Horse in each individual phase of an Eventing competition, the EquiRatings Expected Values are the most effective values. They measure expected performance in dressage, show jumping, cross-country jumping reliability and cross-country speed. These are complex formulae that account for recent trends, the difficulties of past conditions and the likely impact that these have on future performance.

HPR Score

The HPR score accounts for course difficulty, scoring conditions and the quality of opposition for a single performance.

Power Average

The power average is the average of the *three best* finishing scores for a given horse or rider over a given dataset. A horse could therefore have a season power average at four and five-star levels.

Two Phase Average

The two-phase average is the average of all dressage *and* show jumping penalties for a horse or rider over a given dataset. The two-phase average excludes cross-country penalties as these can skew the statistics if a rider is opting to compete at a slower pace.

Zone Analysis

Zone Analysis is a simple way to organize *finishing scores* into various scoring zones. This helps to give a visual representation as to whether a horse/rider/nation tends to score in excellent/good/average ranges, or whether they have poor outcomes or even non-completions.

FITNESS – Whether the athlete or horse competed at a high level more frequently than is consistent with delivering a peak performance at the event for which selection is being made. Whether the athlete or horse demonstrated in training the modicum of preparation necessary for preparedness for the rigors of the event for which selection is being made.

INTERNATIONAL COMPETITION EXPERIENCE - A competitive record over the past 3 years that indicates that the Athlete/Horse combination has successfully met the challenges of FEI international events, demonstrating an ability to perform under pressure consistently.

LOSS OF FORM - Deterioration in performance and/or demonstrated inability to produce results at the level at which the combination was performing at the time at which they were selected.

RIDEABILITY – Whether the Horse exhibits in all three tests - dressage, cross-country, and show jumping - that it responds readily to the aids (directions) of the Athlete because of its training; whether it moves forward, slows down, turns, and jumps any obstacle with composure, obedience, and confidence in itself and the Athlete.

SPEED - Evidence that in the FEI record of the Athlete/Horse combination, and in the final trials for the Team, the Athlete/Horse combination shows the ability to complete the Championship distances at the speed specifications for that level in accordance with the [FEI Rules for Eventing](#).

SOUNDNESS - A condition in which a Horse is able to do the work asked of it without undue stress or risk of injury.
